The Path of the Falls

Moderate walk on the 1,200-meter trail with an overview of the waterfalls that make up the Iguassu Falls. There are contemplation belvedere on the way allowing for a closer view of some falls. During the tour, visitors can observe some species of the wild fauna and flora of the Park. The end of the trail gives access to the most dazzling fall, the 90-meter high Devil's Throat.

The Iguassu Falls

The falls are formed by the waters of the Iguassu River, which means big water in Tupi-Guarani language ("water", "river" and gusu or gasyu - "big"). The river runs 1,320km westwards and Argentina. The Iguassu River rises in eastern Curitiba, near the coastal mountain chain called Serra do Mar, and flows into the Paraná River. In the La Plata Basin, 80 meters above sea level. The Fall date from about 150 million years ago, basing around 275 waterfalls, its roundly. The annual average flow of the Iguassu Falls is 1,413 m³/s. However, its largest flow, 2,500 m³/s, occurs in October. On the other hand, the smallest water flow is measured at 1,250 m³/s in April.

Bear in mind

- Drink plenty of water to stay well hydrated
- Wear sunscreen
- Use repellent to avoid insects
- Wear raincoats because there's a constant light drizzle in the falls
- Wear clothes and shoes suitable for walking.
- All these items are available in the gift shops of the Park.

Get to know optional tours and plan your trip

There's a tourist information desk in the Visitors Center. There you can get information about all the tours and buy your tickets in advance.

Visit the Iguazú National Park in Argentina

In order to contemplate the full splendor of the Iguassu Falls, visit the Iguazú National Park in Argentina. It's worthwhile because the tour is different but complementary to cross the border's mandatory to show your passport. The ticket for the Argentine Park must be payed in Argentine Pesos.

Warming!
Respect the Iguassu National Park

- Stay on the pre-established trails. Do not take shortcuts.
- Throw the trash in the trash can or find a way to wrap it up and bring it back with you.
- Do not feed the animals. Watch them from a distance.
- Walk in silence, preserving the tranquility and sense of harmony that nature offers.
- Animals, plants, rocks, fruits and seeds found at the site are part of the environment and must remain there.
- Take only photographs, leave only light footprints and take home only your memory.

Beware of Quits

Watch out for quits when you are eating. Although they are used to people, they may attack because of food. These animals can transmit rabies to humans - acute and deadly infectious disease, transmitted through the bite, scratch or lick of the animal infected with the virus.
